

**Financial advisory is  
evolving.**

**Adapt and lead – or  
fall behind.**

**Olymp is here to provide the tools for evolution:  
secure and modular artificial intelligence.**

# Modules

# Use Cases

## Equity Research Assistant

*Example Use Case*

Automate routine workflows to focus on your core business and key value drivers. With this solution, you can analyze files, extract essential information, and calculate KPIs. Generate insightful charts and seamlessly populate report templates while translating content into multiple languages.

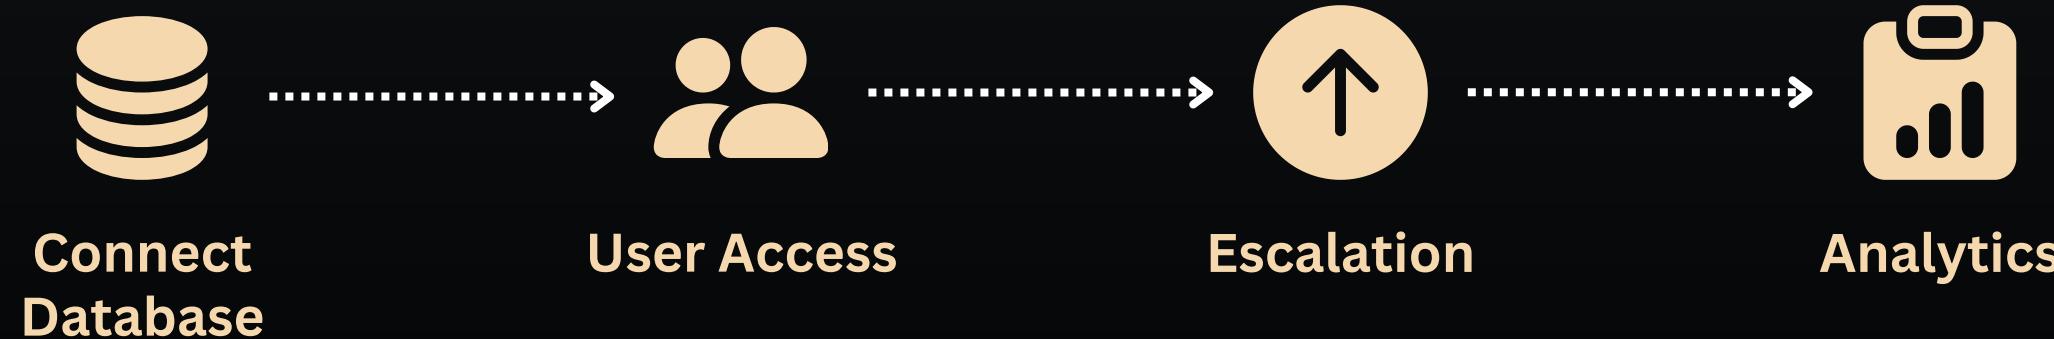

# Use Cases

## Client Assistant for Wealth Management

*Example Use Case*

Financial advisors often juggle multiple clients, making it challenging to address individual needs effectively. Our solution seamlessly connects to your database, allowing clients to ask questions about their wealth directly. Critical inquiries are automatically escalated to a human agent, ensuring personalized support. Additionally, you can gain valuable insights into the topics that matter most to your clients.
